Frequently Asked Questions

What is a Direct to Employer Program?

The direct to employer program is a initiative with AdventHealth that allows employers to work directly with the AdventHealth network or care network, bypassing the intermediaries or insurance companies. This is designed to lower costs with a strategy to better manage claims and control costs. The plan design can be customizable to fit your employer needs and we can customize plans. The program is a partially self-funded program that offers total health management allowing employers the ability to better manage and control their health care costs.

What differentiates this program from traditional insurance plans?

Traditional insurance plans are fully insured and costs will never allow you to benefit from good health performance. This program has many cost saving components and offers better claims management and cost containment strategies.

What happens if I don't want to go to a provider or facility in the plan?

The plan designs provide incentives to the employees to use an AdventHealth provider or facility. There would be access to a national network, which would allow your employees to use other providers or facilities outside of the network. For employers with employees out of the coverage area there will be a choice for national coverage.

What happens if I am out of town and have an accident and must go to the emergency room?

Emergencies are covered under any plan as if they were in network.

What are the advantages of this program?

This program is a direct to employer arrangement that is contracted directly with AdventHealth offering competitive pricing. It bypasses intermediaries, and insurance companies to help lower your healthcare costs.
